Weird audio glitch makes a \*pop\* sound when I click buttons. Happens going through wardrobe, and join night. Seems like the sound isnt fully rendering.

Lighting on tee off is too bright - hurting my eyes. Also very weird glitchiness trying to play. Too many characters on the map. Cant see the ball to play. If you click fast enough you can steal the bots traps if you are playing against them. Ah nvm everytime I go back to the menu and come back (ie forfeit) the game state stays and adds onto the last one.

Clicked echo chamber and now even the golf has stayed. Echo chamber is now on top.

Trying to test the games by going through minigames btw.

Also trying to start a new estate game just brings me back to the main menu screen.

Wasnt able to test much cause of the game breaking bugs unfortunately.
